PROFILE

Ahmed Abdulameer Naser Alshaybawee is an emerging scholar and researcher dedicated to advancing academic inquiry and contributing to his field of specialization. As an active investigator, he has established a growing academic portfolio focused on addressing key thematic questions through rigorous research and peer-reviewed dissemination.

To date, Alshaybawee has contributed three scholarly publications documented on Google Scholar, reflecting his engagement with current academic literature and methodical investigation. His research outputs have begun to gain traction within the scientific community, currently holding an h-index of 1 with an initial citation record that underscores the relevance of his early contributions. His work emphasizes sound methodology, critical analysis, and the synthesis of evidence to support ongoing scholarly dialogue.

With a solid foundation in academic publishing, Alshaybawee continues to expand his research footprint through ongoing investigations and collaborative endeavors. He remains committed to scholarly excellence, aiming to generate high-impact contributions that advance theoretical knowledge and practical applications within his academic discipline.

PUBLICATIONS (3)

1. An Optimization Paradigm for Sustainable RIS-Assisted Cell-Free Networks
   Journal of Communications Software and Systems 22 (3), 467-481, 2026 | 2026
2. A Sustainable Paradigm of RIS-Aided Cell-Free MIMO for IoT Networks
   International journal of electrical and computer engineering systems 17 (8 ..., 2026 | 2026
3. SINR and Capacity Analysis for Multiuser MIMO Interference Channels
   IOP Conference Series: Materials Science and Engineering 1076 (1), 012056, 2021 | 2021 | Cited: 1
